

So we all have ORCID integrations,  
now what?

Update on latest trends

# ORCID Support Status

## **Available today**

- Lookup and import of an author's works from ORCID.
- A framework for working with the Tier 2 API
- Extraction of ORCID iDs for authors from University CRIS data.
- RIOXX2 plugin: Author lookup via the ORCID API.

## **6 month roadmap**

- Get notified of modifications to works using WEB HOOKS API
- Workflows to add ORCID iDs to existing items in the repository.

# DSPACE

## **Available today**

- Author lookup in item submission and administrator edit
- Author lookup in CSV batch ingests
- Local cache of used ORCID data, separate from item metadata

## **6 month roadmap**

- Improve how ORCID information is shown to end users

## **Available today**

- Link Repository user account to ORCID iD
- Publish repository user works or bio information to ORCID
- Import researcher metadata records from ORCID
- External collaborator authentication via ORCID iD
- Can be used by anyone using Ruby on Rails at ORCID API Request layer

## **6 month roadmap**

- Maintain support inline with ORCID API changes and improvements

## **Available today**

- Author lookup in item submission and administrator edit
- Local cache of used ORCID data
- Tool to claim repository content on user's ORCID profile

## **Available real soon now**

- Links from item pages to ORCID profiles
- Login via ORCID authentication
- ORCID identifiers in DataCite DOI metadata
- Tool to import ORCID identifiers into repository metadata

## **6 month roadmap**

- Leverage ORCID identifiers to allow editing permissions for co-authors

What should we achieve by next OR?

Make it **easier** for someone to log in

# Automate submission of new content

# Maximize metadata reuse - Minimize work

Put **contributors** in the spotlight

Ensure our repositories are **relevant** to them

# Integrate more **metrics** and **metadata**

Increase reach by **feeding back** to ORCID

## **JUMBO FEEDS BABY CASTORIA**

*From peasant nurse to high born lady,  
All mothers know what's good for baby,  
CASTORIA.*

*While Jumbo, too, though not a lady,  
Follows suit and feeds the great baby  
CASTORIA.*

# Ok, let's do this

- Priorities: what should we be doing first?
- How can development in one platform benefit another? Can we share more than ideas?
- Can we align UX across platforms?
- What do we jointly need from ORCID?
