Hydra Project Partner Letter of Agreement

Hydra is an inter-institutional collaboration to build a common, open source framework for multi-function, multi-purpose, repository-powered applications. Hydra's ultimate objective is to produce a community-sourced, sustainable application framework that provides rich and robust repository-powered solutions as an integrated part of an overall digital content management architecture.

The Collaboration and Partnership Memorandum of Understanding of the Hydra Originating Steering Group Members (hereinafter "Hydra MOU") which is attached to this letter agreement and incorporated herein by reference describes the project background, intellectual property licensing and ownership, project membership and governance, the responsibilities of the four Hydra Steering Group members (Stanford University, University of Virginia, University of Hull, and MediaShelf LLC) and the responsibilities of Hydra Partners. As provided in the MOU:

Hydra Partners are institutions, corporations, individuals, or other groups that have committed to contributing to the Hydra community and wish to become fully participating Hydra Partners. They not only use the Hydra technical framework, but also add to it in at least one of many ways, including: code, analysis, design, support, funding, or other resources. Hydra Partners collectively advance the project and the community for the benefit of all participants. Partners get to attend Hydra Partner meetings, provide input on the community and technical direction, and represent Hydra to the broader community. Candidates can join Hydra Partners by being nominated by an existing partner to the Steering Group, and being voted in by the Steering Group. Hydra Partners can be voted out by a majority of the Steering Group members. Partner participation is a privilege, not a right. New Hydra partners must execute the Partner agreement to be countersigned by a designated representative of the Hydra Steering Group.

By executing this letter agreement, the entity named below indicates its wish to join the Hydra Project as a Hydra Partner and further confirms that it has reviewed, understands and agrees with the terms outlined in the Hydra MOU. The applicant has been nominated by an existing Steering Group Member.

Northwestern University _____ May 14, 2012
Entity Authorized Signatory Date

Nominated by: Tom Cramer _____ (Steering Group Member)

Application Accepted by the Hydra Steering Group: Yes No

Date: 21 May 2012 _____

Hydra Steering Group Authorized Signature: _____

DISCIPLINES OF A LEARNING ORGANIZATION

A learning organization is one that seeks to create its own future; that assumes learning is an ongoing and creative process for its members; and one that develops, adapts, and transforms itself in response to the needs and aspirations of people, both inside and outside itself.
