

# A Digital Archive for the UK City of Culture 2017

Hull is the UK City of Culture for 2017. This celebration of the arts is a year long programme of cultural events and engagements, starting in January 2017. All these activities will generate digital material. The development of a digital archive for the year will be a means of capturing a snapshot of what took place and building a legacy for others to enjoy and research in the future.

Preservation

Organisation

Identification

Delivery

The digital archive will use the Box/Archivematica/Hydra workflow developed for research data as part of the 'Filling the digital preservation gap' project (see separate poster and presentation), which was designed to allow it to be used for broader digital archiving purposes.

*With thanks to Box, Artefactual, Cottage Labs, Richard Green and colleagues at the University of York*

Business  
archive

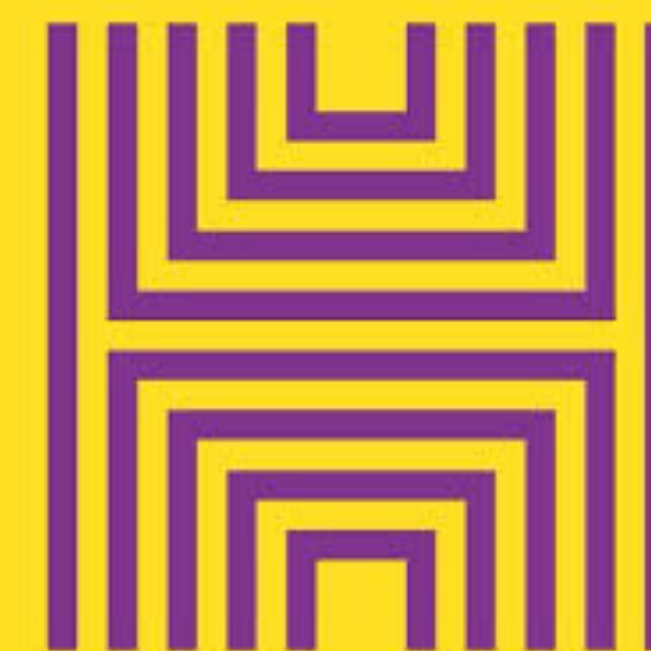

The papers of the City  
of Culture company

Creative  
archive

Materials generated  
by the artists

Event  
archive

Material created at the events,  
e.g., by those attending
