

WIN-A-LOT WITH DOG BISCUITS

JULIE ALLINSON, COSECTOR - UNIVERSITY OF LONDON

Dog Biscuits is a gem for Hyrax work types. It provides a growing set of available models and takes the heavy lifting out of setting up a new work type in Hyrax, but still allowing for local customisation.

```
rails generate dog_biscuits:work JournalArticle
```

```
force app/indexers/journal_article_indexer.rb
force app/models/journal_article.rb
force app/forms/hyrax/journal_article_form.rb
identical app/presenters/hyrax/journal_article_presenter.rb
force app/actors/hyrax/actors/journal_article_actor.rb
identical app/views/hyrax/journal_articles/_attribute_rows.html.erb
generate dog_biscuits:locales JournalArticle
info Generating locales for JournalArticle
insert config/locales/hyrax.en.yml
```

```
Customizing a Work the 'dog_biscuits way':

in config/initializers/dog_biscuits.rb change the defaults:

fields to display in search results:
config.index_properties

fields to display as facets:
config.facet_properties

properties and order in the form and show page:
config.your_work_properties

required fields in the form
config.your_work_properties_required

Re-run the Work generators (these will overwrite any local changes):
rails g dog_biscuits:work Work
```
